Careers Page

Objective: To develop a dynamic career page that allows users to browse job openings and submit applications, integrating front-end and back-end technologies for a seamless user experience.

Technologies Used: Utilized HTML, CSS, JavaScript, PHP, Mysql.

Outcomes: The project resulted in a responsive, fully functional career page where users can apply for jobs, with data stored securely in a MySQL database. The integration of PHP, MySQL, and front-end technologies ensured smooth interaction and user satisfaction across devices.

Payment and Subscription Page for Learning

Objective: Developed a payment and subscription page to streamline access to educational resources for students.

Technologies Used: Utilized HTML, CSS, JavaScript, and integrated payment processing with [Stripe/PayPal/etc.].

Key Contributions: Designed an intuitive user interface, implemented secure payment methods, and collaborated with the team to ensure functionality and security.

Outcomes: Improved user satisfaction and experience by creating a seamless and secure payment process for users.

Certificate generation and Certificate display page

Objective: Developed a Certificate Generation and Display page to automate the creation and presentation of certificates for users.

Technologies Used: Utilized HTML, CSS, JavaScript.

Outcomes: Streamlined the certificate issuance process, enhancing user satisfaction by providing a quick and accessible way to view and download certificates.
